House of Representatives

FILNER MOTION TO INSTRUCT CONFEREES ON THE ENERGY POLICY ACT

**HON. BOB FILNER
OF CALIFORNIA**

IN THE HOUSE OF REPRESENTATIVES

MR. FILNER: Mr. Speaker, I rise today to speak on this motion to instruct the conferees on the energy bill. Mr. Speaker, sometimes the Republican Party is called the GOP. Well, I often wondered what that meant. It is clear from this energy bill that it means gas, oil and petroleum. And my motion would instruct the conferees to strike a section of H.R. 6, which represents a shameless payback to the oil and gas companies of this Nation.

This section, if my colleagues can believe it, Mr. Speaker, grants oil and gas companies a free pass from complying with the Clean Water Act, a free pass from complying with one of the major environmental laws that was

passed in the 1970s. Under this section, oil and gas development and production sites, oil and gas development and production sites and construction sites do not have to worry about what their activities are doing to our water supply. No other industry in America gets this exemption; only the oil and gas development and production industry. And, they are under no obligation to control storm water runoff that would sully our beautiful lakes, rivers, and streams, and they suffer no consequences.

It must be nice for the oil and gas companies to have friends like that in Congress and in the White House, especially when these friends are members of the majority party, the

(over)

GOP, gas, oil and petroleum, who, rather than dealing with the messy process we so often revere here and hold up as a model of democracy in the world, simply block out all those who would disagree with them. Heaven forbid anybody would bring up objections about the health of our water, not to mention the health of our people. The majority party, gas, oil and petroleum, has blocked out any dissenters right from the beginning on this bill.

One of my colleagues, the gentleman from Massachusetts (Mr. Markey), tried to introduce an amendment to strike this section, but he was ruled out of order and, get this, because the Committee on Energy and Commerce said it was not under their jurisdiction, but it was under the jurisdiction of the Committee on Transportation and Infrastructure, but that Committee on Transportation and Infrastructure never considered the bill. Talk about a Catch-22. And attempts to remove it on the floor of this House were thwarted by the Committee on Rules.

It is widely acknowledged that the majority did not allow the minority to

participate, even in the conference committee, where the Senate and House meet to deal with their differences. So there was never a chance for honest debate of this section. This is what we call as a model for the world, a democracy.

So what do we have now, Mr. Speaker? A situation where oil and gas companies will be able to pollute our waters so that our children and grandchildren will not be able to use them. Our waters will be spoiled, our health will be threatened, but that is okay. We do not need clean water anyway, as long as we have our oil. And any suggestions that we invest more in renewable energies or in cleaner energies all were thrown out, and the handouts to the oil companies just keep getting bigger and bigger.

Right now, I encourage my colleagues to stop this insult to the environment and to the democratic process. We ought to vote "yes" on this motion to instruct and not to let the oil and gas companies pollute our waterways, and we should let the Nation know that we care about clean water.
